Section A: draw and label ONE example app

Name: _____ Class: _____

TOPIC

App design

WAGBA

Research an app, then draw a clear plan for your own app.

Short labels and arrows are enough.

No paper? Ask Mr Dave.

Research app name: _____

Draw the example you studied. Label a title, an image or drawing area, and one control.

My research route

[ ] I ran the MIT app

[ ] Picture and description

[ ] Classroom simulation

One action and its result:

_____

_____

Not run? Label the result as a prediction.

This feature helps the user...

_____

Section B: sketch YOUR app

Name: _____ Class: _____

App name: _____ My user: _____

1 BEFORE THE ACTION

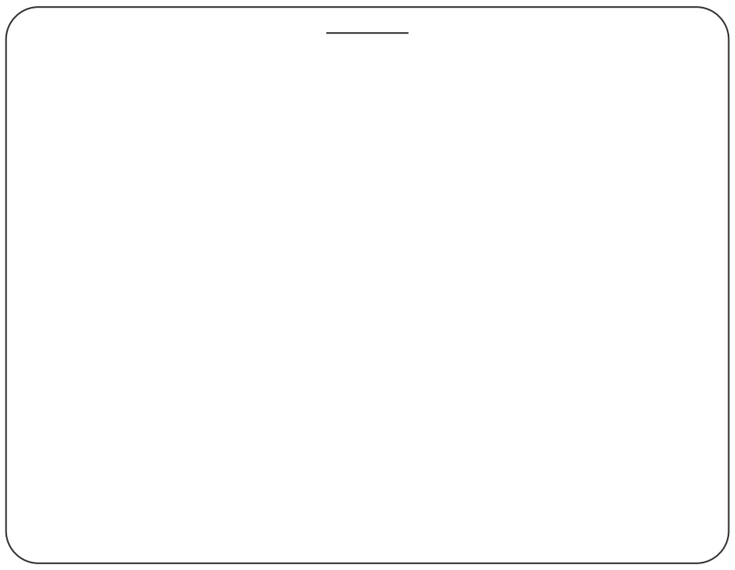
Draw the start. Circle where to tap or drag.

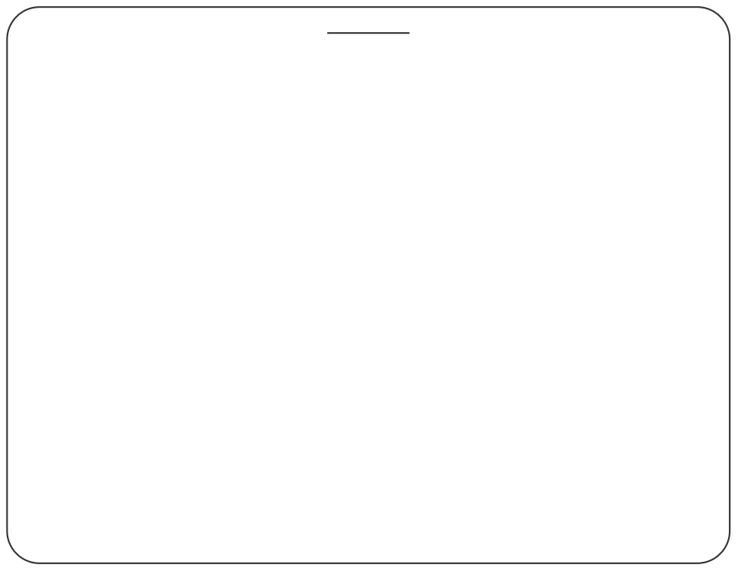
2 AFTER THE ACTION

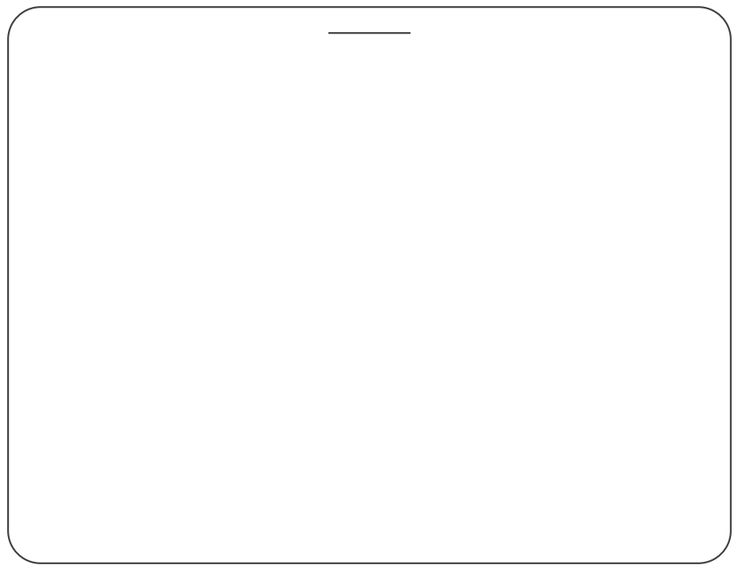
Show the exact change. Add an arrow and a label.

3 START AGAIN

Show what Clear, Reset or Back does.







One design choice: _____ It helps my user...

WAGOLL 1: Show a picture that matches the choice

Read the numbered design choices. Match each number to its purpose below.

TOPIC

App design

WAGBA

Research an app, then draw a clear plan for your own app.

AUDIENCE

Teenagers choosing an outfit.

USER GOAL

See an outfit that matches their chosen style.

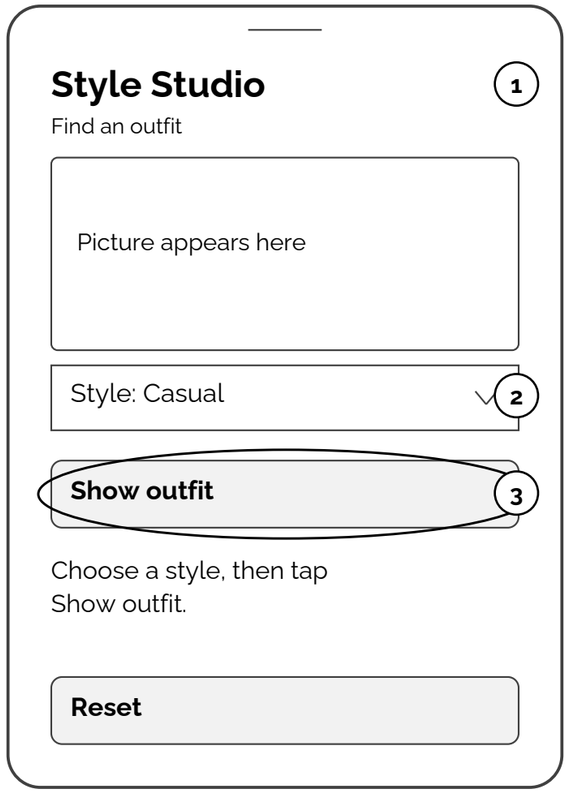
ONE IMPROVEMENT

Add a matching picture. Keep the existing choices and messages.

Circle the tap. Draw the result. Explain why it helps.

1 BEFORE THE TAP

Select Casual. Tap Show outfit.

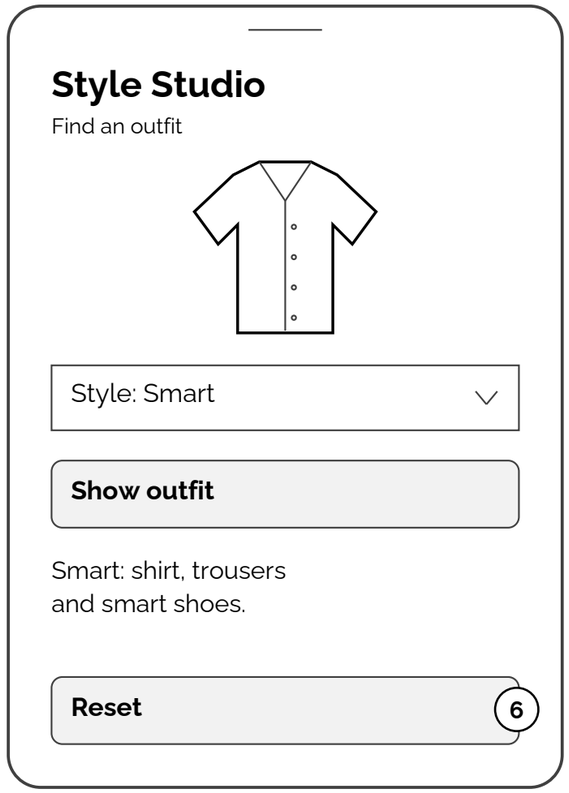


2 AFTER THE TAP

The picture AND message match Casual.

3 ANOTHER CHOICE

Select Smart. Tap Show outfit again.



1 Title and short description

Tell the user this app helps them find an outfit.

2 Labelled choice

Shows the current style before the user taps.

3 Specific button name

Tells the user which action will happen.

4 Picture matches the style

Helps the user imagine the selected outfit.

5 Matching text feedback

Confirms which outfit the app is showing.

6 Reset stays in the same place

Easy to find again. Restores Casual, the blank picture and start prompt.

Use the method, keep your own app topic. These are planned views of ONE screen, not working app screenshots.

WAGOLL 2: Add useful Help and a clear Reset

Read the numbered design choices. Match each number to its purpose below.

TOPIC

App design

WAGBA

Research an app, then draw a clear plan for your own app.

AUDIENCE

A new user choosing gaming equipment.

USER GOAL

Find out how to use the app without guessing.

ONE IMPROVEMENT

Add Help. Keep the existing choice, Show gear and Reset.

1 BEFORE THE TAP

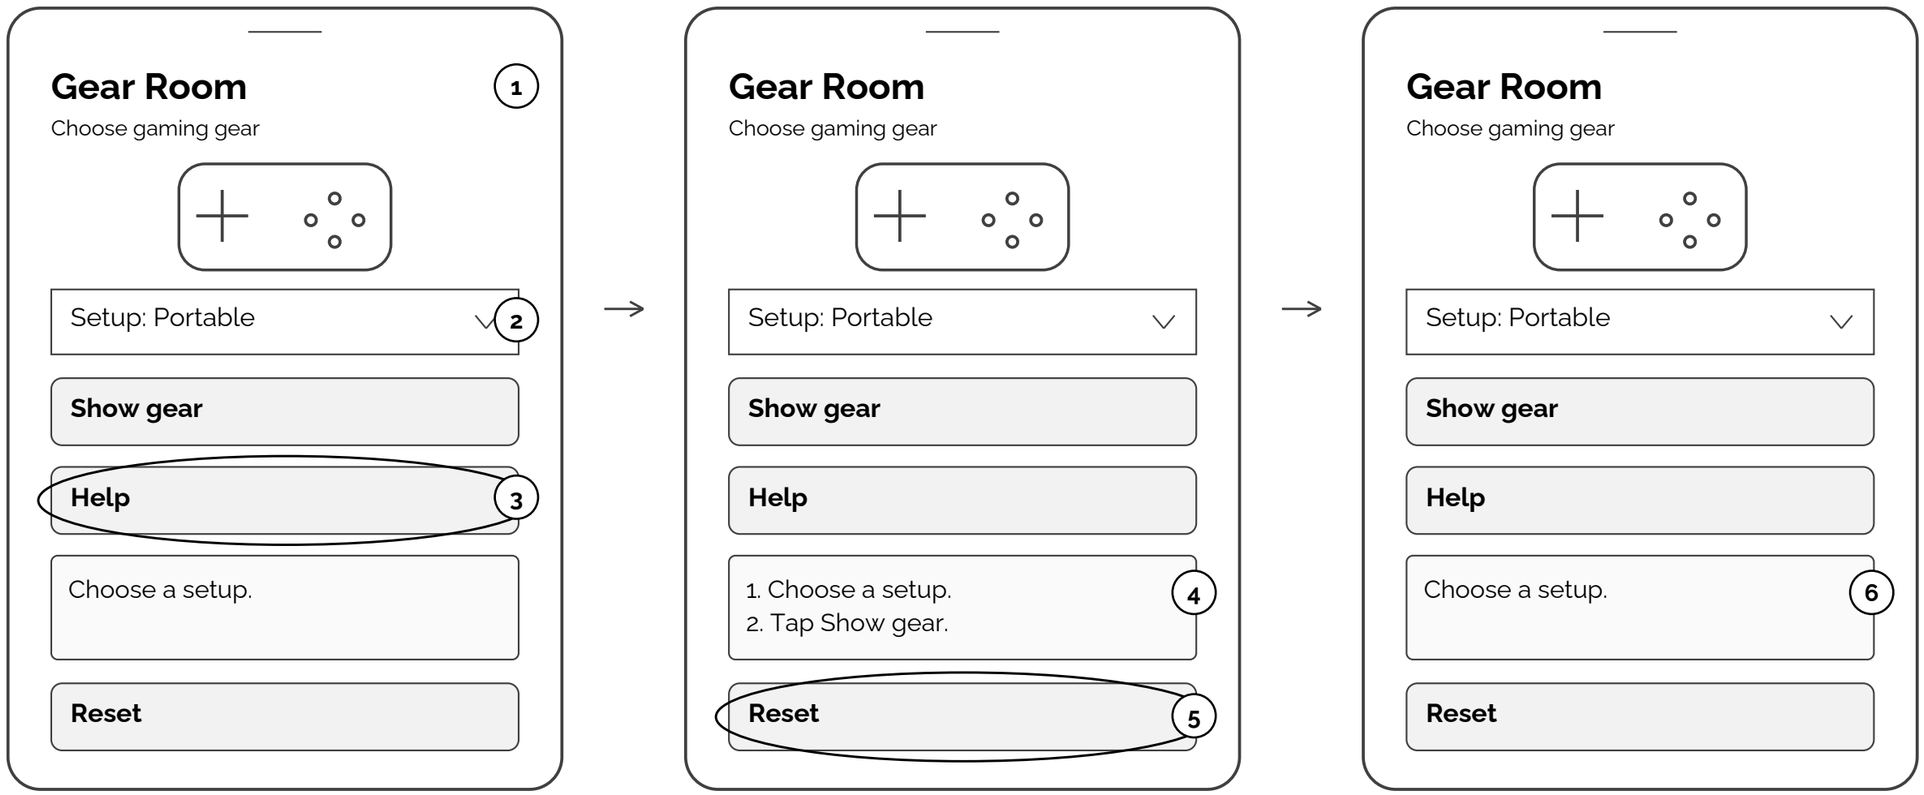
Not sure what to do? Tap Help.

2 AFTER THE TAP

Read the instructions. Then tap Reset.

3 AFTER RESET

The starting prompt returns.



Circle the tap. Draw the result. Explain why it helps.

1 Title and short description

Tell the user this app helps them choose gaming gear.

2 Keep the existing controls

Users can still choose and view their gear.

3 A button named Help

Makes help easy to find without guessing.

4 Instructions in the message area

Gives two actions the user can follow.

5 Reset in a fixed position

Lets the user find it easily and return to the start.

6 Starting prompt is restored

The help message is cleared, so the user can start again.

Use the method, keep your own app topic. These are planned views of ONE screen, not working app screenshots.
