YEAR 9T / APP DESIGN

WAGOLL 1: Show a picture that matches the choice

Read the numbered design choices. Match each number to its purpose below.

TOPIC

App design

WAGBA

Research useful app features, then draw one improvement to your existing app.

AUDIENCE

Teenagers choosing an outfit.

USER GOAL

See an outfit that matches their chosen style.

ONE IMPROVEMENT

Add a matching picture. Keep the existing choices and messages.

Circle the tap. Draw the result. Explain why it helps.

1 BEFORE THE TAP

Select Casual. Tap Show outfit.

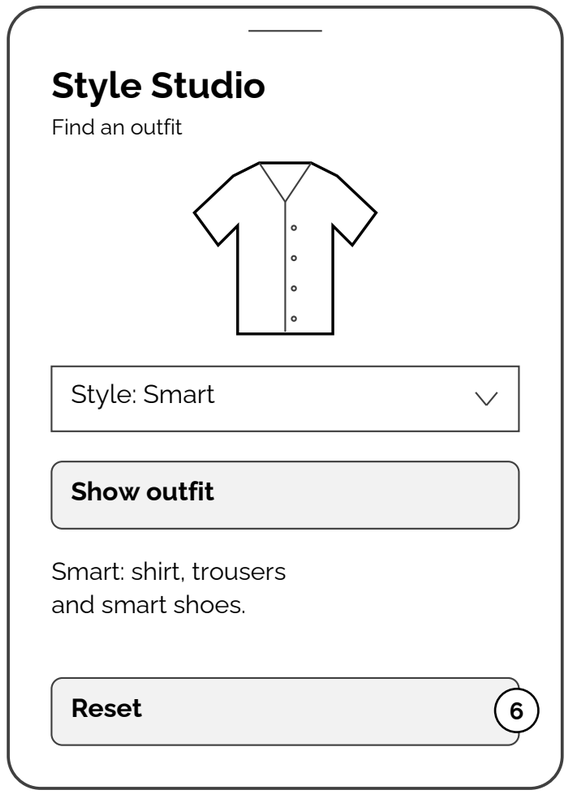

2 AFTER THE TAP

The picture AND message match Casual.

3 ANOTHER CHOICE

Select Smart. Tap Show outfit again.

1 Title and short description

Tell the user this app helps them find an outfit.

2 Labelled choice

Shows the current style before the user taps.

3 Specific button name

Tells the user which action will happen.

4 Picture matches the style

Helps the user imagine the selected outfit.

5 Matching text feedback

Confirms which outfit the app is showing.

6 Reset stays in the same place

Easy to find again. Restores Casual, the blank picture and start prompt.

Use the method, keep your own app topic. These are planned views of ONE screen, not working app screenshots.

YEAR 9T / APP DESIGN

WAGOLL 2: Add useful Help and a clear Reset

Read the numbered design choices. Match each number to its purpose below.

TOPIC

App design

WAGBA

Research useful app features, then draw one improvement to your existing app.

AUDIENCE

A new user choosing gaming equipment.

USER GOAL

Find out how to use the app without guessing.

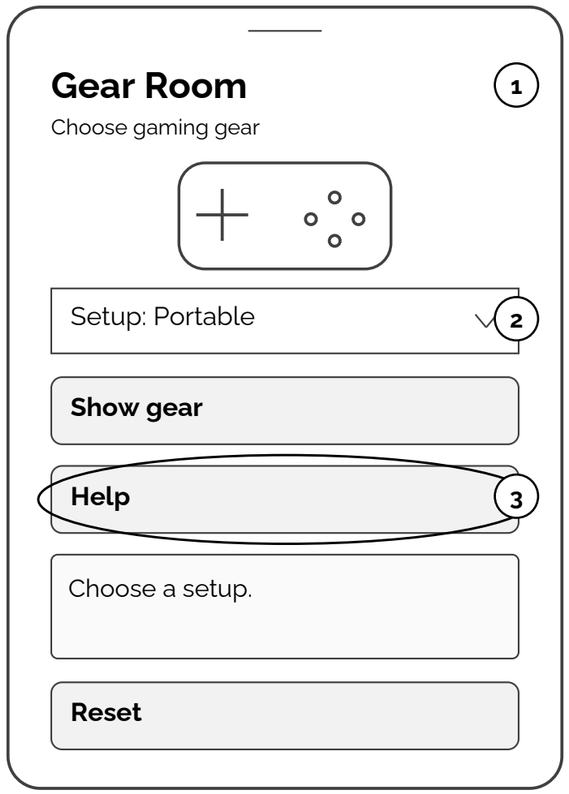

ONE IMPROVEMENT

Add Help. Keep the existing choice, Show gear and Reset.

Circle the tap. Draw the result. Explain why it helps.

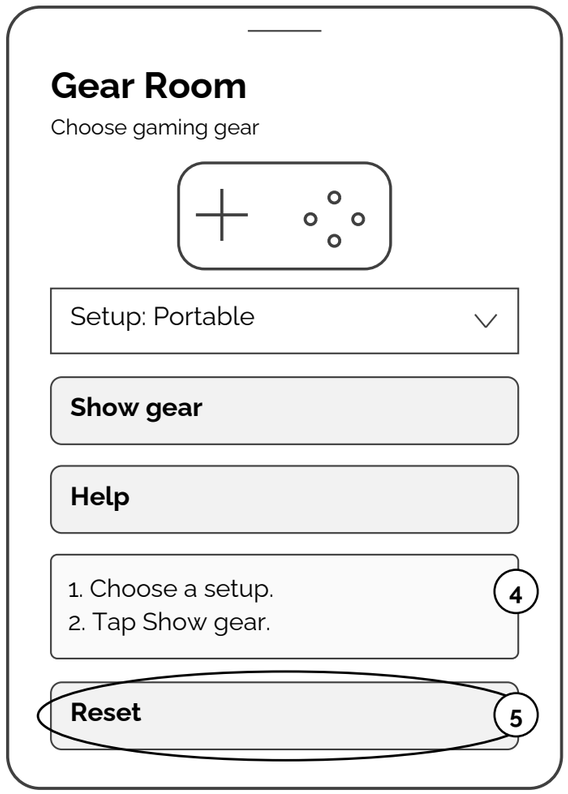

1 BEFORE THE TAP

Not sure what to do? Tap Help.

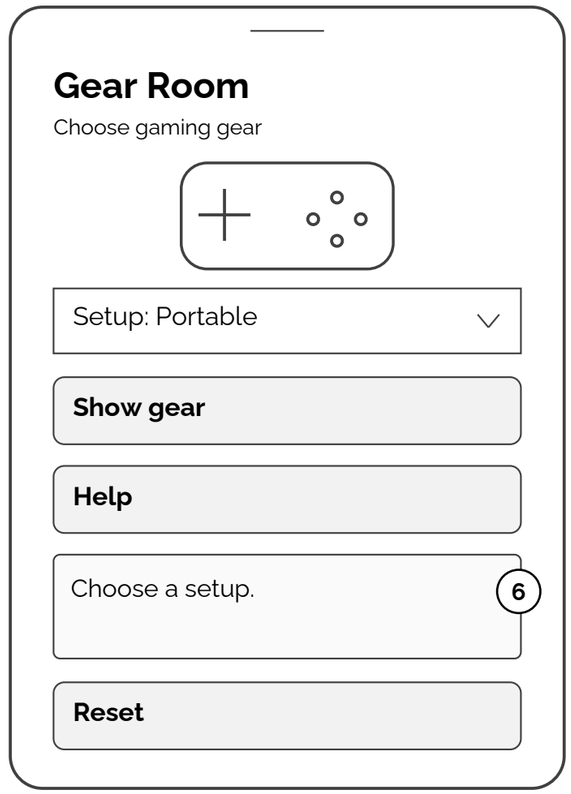

2 AFTER THE TAP

Read the instructions. Then tap Reset.

3 AFTER RESET

The starting prompt returns.

1 Title and short description

Tell the user this app helps them choose gaming gear.

2 Keep the existing controls

Users can still choose and view their gear.

3 A button named Help

Makes help easy to find without guessing.

4 Instructions in the message area

Gives two actions the user can follow.

5 Reset in a fixed position

Lets the user find it easily and return to the start.

6 Starting prompt is restored

The help message is cleared, so the user can start again.

Use the method, keep your own app topic. These are planned views of ONE screen, not working app screenshots.
