

Year 10 - Learning Checkpoint 1

Route 1 · Build | Build the missing idea

Name: _____ Class: _____ Date: _____

Topic: checkpoint review and definite iteration

WAGBA: use evidence and feedback to improve an explanation.

K: recognise the credited idea. S: improve and check a response.

U: explain why the correction or transfer works.

Challenge: justify your answer with a value, example or marking point.

Collect your marked question and its relevant marking points from your teacher.

Question: _____ Awarded: ____ / ____ Whole-test total (optional): ____ / 40

1. Locate the evidence

Copy the important part of your original answer. Show what earned credit and what was missing or inaccurate.

2. Identify the learning need

Choose one missing meaning, rule or step. Is the need knowledge, skill or understanding? Ask for one model if needed.

3. Write a better response

Write the improved answer in your own words. Include the missing idea and make the reasoning clear.

4. Check using evidence

Use an appropriate value, boundary case, trace or marking point. Record what you expected and what your check shows.

Year 10 - Learning Checkpoint 1

Route 1 · Build | Build the missing idea

Name: _____ Class: _____ Date: _____

Topic: checkpoint review and definite iteration

WAGBA: use evidence and feedback to improve an explanation.

K: recognise the credited idea. S: improve and check a response.

U: explain why the correction or transfer works.

Challenge: justify your answer with a value, example or marking point.

5. Prepare an explanation

Use if helpful: I used ___ because the rule says ___. With the value ___, the result is ___. Write first, then show or read this privately to your teacher.

6. Show understanding, not just a copied answer

Explain why the change fixes the problem. If comparisons are your focus, write the wording, symbol and one substituted value separately.

7. Plan one specific next step

Name the question or skill; choose an action (trace three values / practise the boundary / rewrite an explanation / discuss one marking point); state what evidence will show improvement.

8. Reflect on this paper review

K = recalling the idea; S = applying it; U = explaining why it works.

Evidence: 0 not yet | 1 with content support | 2 independently. Not a grade.

Knowledge: ____ Skills: ____ Understanding: ____

Current phase (choose one): new learning / consolidating / treading water / drowning - I need help. Which exact step? _____

Private explanation: prepared / shared with support / shared independently

Teacher check / agreed next step: _____

Return this paper as directed. The website records progress checks, not this answer.

Year 10 - Learning Checkpoint 1

Route 2 · Strengthen | Make the answer precise

Name: _____ Class: _____ Date: _____

Topic: checkpoint review and definite iteration

WAGBA: use evidence and feedback to improve an explanation.

K: recognise the credited idea. S: improve and check a response.

U: explain why the correction or transfer works.

Challenge: justify your answer with a value, example or marking point.

Collect your marked question and its relevant marking points from your teacher.

Question: _____ Awarded: ____ / ____ Whole-test total (optional): ____ / 40

1. Locate the evidence

Copy the important part of your original answer. Show what earned credit and what was missing or inaccurate.

2. Identify the learning need

Match your answer to the marking points. Which detail needs clearer wording, a fuller reason or more accurate application?

3. Write a better response

Write the improved answer in your own words. Include the missing idea and make the reasoning clear.

4. Check using evidence

Use an appropriate value, boundary case, trace or marking point. Record what you expected and what your check shows.

Year 10 - Learning Checkpoint 1

Route 2 · Strengthen | Make the answer precise

Name: _____ Class: _____ Date: _____

Topic: checkpoint review and definite iteration

WAGBA: use evidence and feedback to improve an explanation.

K: recognise the credited idea. S: improve and check a response.

U: explain why the correction or transfer works.

Challenge: justify your answer with a value, example or marking point.

5. Prepare an explanation

Use if helpful: I used ___ because the rule says ___. With the value ___, the result is ___. Write first, then show or read this privately to your teacher.

6. Show understanding, not just a copied answer

Explain why the change fixes the problem. If comparisons are your focus, write the wording, symbol and one substituted value separately.

Year 10 - Learning Checkpoint 1

Route 3 · Transfer | Explain and transfer

Name: _____ Class: _____ Date: _____

Topic: checkpoint review and definite iteration

WAGBA: use evidence and feedback to improve an explanation.

K: recognise the credited idea. S: improve and check a response.

U: explain why the correction or transfer works.

Challenge: justify your answer with a value, example or marking point.

Collect your marked question and its relevant marking points from your teacher.

Question: _____ Awarded: ____ / ____ Whole-test total (optional): ____ / 40

1. Locate the evidence

Copy the part of your original answer that earned credit. Identify the relevant marking points.

2. Identify the learning need

Explain why your response meets the marking points. Choose a new example with your teacher; do not invent a mistake.

3. Write a better response

Write an answer for the teacher-approved new example. Preserve the correct idea while adapting the values or context.

4. Check using evidence

Use an appropriate value, boundary case, trace or marking point. Record what you expected and what your check shows.

Year 10 - Learning Checkpoint 1

Route 3 · Transfer | Explain and transfer

Name: _____ Class: _____ Date: _____

Topic: checkpoint review and definite iteration

WAGBA: use evidence and feedback to improve an explanation.

K: recognise the credited idea. S: improve and check a response.

U: explain why the correction or transfer works.

Challenge: justify your answer with a value, example or marking point.

5. Prepare an explanation

Use if helpful: I used ___ because the rule says ___. With the value ___, the result is ___. Write first, then show or read this privately to your teacher.

6. Show understanding, not just a copied answer

Compare the original and new examples. Explain what stays the same, what changes, and why the approach still works.

7. Plan one specific next step

Name the question or skill; choose an action (trace three values / practise the boundary / rewrite an explanation / discuss one marking point); state what evidence will show improvement.

8. Reflect on this paper review

K = recalling the idea; S = applying it; U = explaining why it works.
